

HOW TO SAVE LIFE.

What is a cough? It is an irritation of the throat and lungs. What causes it? Congestion. Stop the congestion, the irritation ceases and the cough is cured. But how to stop the congestion? Ah, there is just where physicians have always been puzzled. But it must be checked, or pneumonia, which consumption or some terrible pulmonary disease will follow. Some doctors give and liver oil, but such a course is the most advanced and scientific. Nature must be assisted. Pure fish liver oil will do it. See what physicians say.

Prof. Austin, Fall of Bellevue (New York) College, says: "The judicious use of cod liver oil is one of the striking characteristics of progress in the practice of medicine during the last half century."

Prof. Henry A. Mott, of New York, says: "The purity of Duff's Pure Malt Whiskey (as simple analysis will show) is such as to convince a physician or an expert should certainly recommend it to the patient suffering from a cough."

Duff's Pure Malt Whiskey is a certain cure and preventive of consumption and should be kept in every family. It is sold by all druggists and dealers. Be sure and secure the genuine.

AN UNFORTUNATE STRIKE

Dissatisfaction at the Wheeling Hinge Factory

AS TO THE WAGES AND HOURS

Will Probably Result in the Works Stopping Today—The Character of the Disagreement—Other Industrial News Items.

There is trouble at the Wheeling Hinge factory between the company and the employees, concerning the wages and the hours of work. This is the last of the Wheeling industry at which strike has been anticipated. It has been a number of years since there was the slightest labor trouble there, and the concern has moved along in the even tenor of its way, the envy, in respect to freedom from strikes, of most of the other local industrial establishments.

Recently the men have been working on three-fourths time, owing to the dullness of trade incident to the season of the year. To this the men objected, and after a good deal of kicking among themselves, a committee was appointed on last Saturday to wait upon the company and notify them formally that they would not continue to work on three-fourths pay for three-fourths time.

Upon receiving this notice, Superintendent Simpson posted a notice to the men that this week the works would resume on full time, but that a reduction of ten per cent in the wages of all employees would be necessary. This reduction, it is understood, is by the terms of the notice, to go into effect this morning. The men held a meeting at which it was resolved not to go to work to-day at the ten per cent reduction, and as the company maintains it cannot afford to continue to pay the wages now prevailing, a strike to-day now seems inevitable.

The public, and particularly the residents of East Wheeling, will hope that the difficulty may be amicably adjusted and work continue on terms satisfactory to both parties.

THE WHEELING STEEL PLANT.

The Strike in Steel Quo—The Men Anxious to Work.

Since the Wheeling steel plant closed down last week in 1888, it has not turned a wheel, and there seems no immediate prospect of a settlement. The employees are anxious to get back to work, but the company claims that the existing suspension is not its fault and that in the present condition of the steel market it would not pay to sign the Amalgamated Association scale, which is what the men are standing out for.

One of the men who belong to the Amalgamated Association, which is the plant a majority of men belonging to the Amalgamated Association, which is why authority to present the K. of L. scale was withdrawn by the executive board. The K. of L. scale runs till December 31, while the Amalgamated Association scale only remains in force until July.

Some of the men are said to have expressed a willingness and a desire to effect a settlement on mutually acceptable terms recently, but before this suggestion could be acted on, the story goes, the Amalgamated Association, which is the plant a majority of men belonging to the Amalgamated Association, which is why authority to present the K. of L. scale was withdrawn by the executive board. The K. of L. scale runs till December 31, while the Amalgamated Association scale only remains in force until July.

After several years' absence, those famous comedians, the Florences, will return for two nights, Wednesday and Thursday next, and present their successes, "The Mighty Dollar" and "Donkey and Son." As the Hon. Hardesty says, "The Mighty Dollar" is the most popular play in the world, and as Captain Cuttle in the latter Mr. Florence presents a picture of the old salt in Dickens's great novel that embodies all the characteristics of the author's ideal.

The State Line Railroad.

A. B. Paul, secretary of the Wheeling, Wellburg & State Line railroad, says the Cannonsburg Local-Herald, has been doing some good work between here and the State line the past week. He has been holding meetings all along the proposed line, and the price of seats in the new cars has been reduced to such an extent that would be derived from the new railroad. The people, seeing the new project means a new era of prosperity for them, have taken hold of it with a vim and a will that will land it in our valley if they meet with proper support.

THE LOCAL INDUSTRIES.

Intelligence from the Factories of Wheeling and Vicinity.

The flint glass workers have decided to hold their reunion at Rock Point, on June 30.

It is said that work will be commenced on the South Penn road in Martin's Ferry on April 1.

Mr. Moran, the new foreman of the Wheeling & Harborside Railroad tunnel work, has arrived, and took charge yesterday.

The heaters in the Benwood Iron Works have been making six heats per day for the past few days, owing to the shortage of the gas supply. Eight heats have been made since Saturday morning.

It is reported that a number of glass men who went from here to Fostoria to contemplate returning and forming a joint stock company and changing the foundry into a local making establishment.—Wellburg Local.

John Hayne, Charles Morris and Newton Crossley, well-known painters of Martin's Ferry, leave this morning for Anderson, Ind., to work on the American Glass Works to be built by Martin's Ferry men. Mr. Hayne will superintend the construction of the works. Work will be commenced as soon as possible.

The Pittsburgh Times of yesterday says: President Welles, of the Amalgamated Association of Iron and Steel Workers, returned from a trip among the Ohio Valley lodges yesterday. He professed ignorance of the reported salary proposition of niggers, and thought it could be true. The proposal to accept an annual salary in lieu of the present scale was said to have originated with Belaire sailors. The Belaire Iron Works, however, have not been able to learn anything definite about the starting of the Nall Factory. The matter of running more machines or making less money than heretofore seems to be the question now. It is said that the Belaire men are not so much relieved on taking the new scale as they slept all night, and with one bottle less of medicine cured. Her name is Mrs. Luther Lutz.

EVERY person who desires to purchase a home should attend the assignee's sale at the Court house on Saturday morning next. The property is a good one, situated at the corner of South Front and Fink streets, (Island) will be offered for sale. This is one of the most desirable locations in the city and a rare chance to secure a cheap and delightful home. J. B. SOMERVILLE, Assignee.

A Woman's Discovery.

"Another wonderful discovery has been made and that too, by a lady in this country. Disease fastened its clutches upon her, and for seven years she withstood its severest tests, but her vital organs were undermined. Her strength seemed imminent for three months she coughed incessantly and could not sleep. She bought of us a bottle of Dr. King's New Discovery for consumption, and to her surprise it cured her. It was so much relieved on taking the first dose that she slept all night, and with one bottle less of medicine cured. Her name is Mrs. Luther Lutz.

HOME FROM WASHINGTON.

The Accurately Rushing West Before Their Tickets Expire.

The rush for home of those who went to Washington to see President Harrison's inauguration, commenced at Washington Monday evening and has kept up ever since. Yesterday the trains were crowded and to-day they will be packed to overflowing, for the excursion tickets nearly all expire to-night.

For the past two days all the regular trains have had two runs in three or four sections, and sleeping car accommodations have been at a premium.

The Baltimore & Ohio road, which caught the big end of the inauguration business heretofore, is having the same experience now that it had the last three days of last week, except that the crowded trains are running to the West instead of to the East.

Some of the Wheeling pilgrims have returned home, but the majority of them will not be in until today. Among those who have returned are "Judge" John Beyer, of the Western Union office, Capt. Henry Seamon, C. H. Watkins, Dominick Morris, S. G. Smith, Henry Schumacher and Alf Paul.

Improvements at the Stamm.

The dining room of the Stamm House during the past ten days has been undergoing a transformation that has made it a very handsome apartment. It has been refitted, the work being done by Mr. Henry Thies, an artist restorator from Baltimore, and his assistants, who were engaged by Mr. Stamm to come on here for the special purpose of doing this work. That Mr. Thies is an artist of no mean ability is attested by the work he has done.

The scaffolding was removed yesterday and the work seen for the first time so as to be appreciated; every one was pleased with it. The backgrounds are subtle bright colors and gold; the base of the walls is finished as to represent marble panels. The entire effect is very tasty and makes the room a most cheerful one. Mr. Stamm is justly proud of his dining room.
